## **To Whom It May Concern**

This is to certify that **Aman Kumar Raj** has done his project under my supervision from 15th August 2021 to 15th November 2021.

He has worked on a project titled “**Electric Vehicle Routing Problem**”. This project was aimed to develop an efficient approach for the routing of an electric vehicle from source to a destination such that the overall objective should be optimized. As part of the project, he has worked as a developer and proposed the approach which solved the problem efficiently.

His performance is satisfactory as he has given sincere effort to understand the problem and to learn new things.

I wish him all the best for his upcoming career.

*Jaishree Mayank*
